PROFILE

Fourth-year cybersecurity student at ENSA Tangier with hands-on experience designing network infrastructures, configuring routers and firewalls, and building security monitoring systems. Seeking a 2-3 month internship to apply my technical skills in a professional cybersecurity environment.

EDUCATION

2026 – 2028 | Engineering in Cybersecurity

ENSA Tangier – National School of Applied Sciences, Tangier, Morocco

2022 – 2024 | Preparatory Classes

ENSA Tangier – National School of Applied Sciences, Tangier, Morocco

2021 – 2022 | Baccalaureate

Charif Al Idrissi – Specialization: Physical Science / French International Section

CERTIFICATIONS

- CCNA: Introduction to Networks
- CCNA: Switching, Routing, and Wireless Essentials
- CCNA: Enterprise Networking, Security, and Automation
- HackTheBox Academy – Web Penetration Tester Path (CWPT) – *In Progress*

PROFESSIONAL EXPERIENCE

July – August 2026 | Cybersecurity Internship – VPN & Strong Authentication

AGT MAROC, Tangier, Morocco

- Designed and deployed a secure remote-access VPN infrastructure (pfSense, OpenVPN) with mutual TLS certificate authentication
- Implemented multi-factor authentication (RADIUS, PAM, Google Authenticator TOTP) enforcing password and OTP verification for every VPN connection
- Built a complementary SIEM layer (Wazuh) with custom decoders and correlation rules, including real-time brute-force detection
- Deployed DNS-based content filtering (pfBlockerNG) to detect and block unauthorized access to AI tools, with automated SIEM alerting
- Diagnosed and resolved network routing, firewall, and certificate issues across the VPN, authentication, and logging pipeline

August 2025 | Observation Internship – IT Department

Mohammed V International Airport, Casablanca, Morocco

- Discovered the IT operations of one of Morocco's largest international airports, a high-availability and high-security environment

ACADEMIC PROJECTS

Personal Network & DevOps Lab – TechNova V3 (PNETLab)

- Built a complete enterprise network in a virtual lab using Cisco routers and switches, with redundant paths, automatic failover, and a FortiGate firewall in high-availability mode
- Deployed a Zabbix monitoring system in Docker containers tracking 13 devices in real time, with alerts and a network topology map
- Created an automated nightly backup server with 7-day rotation policy for device configurations

Personal SOC Lab – Home Security Operations Center

- Built a fully functional SOC at home on VirtualBox, with pfSense as central firewall splitting traffic into 4 isolated zones (Internet-facing, DMZ, internal users, admin)
- Deployed professional SOC tools: Wazuh (SIEM), TheHive and Cortex (incident response), and MISP (threat intelligence), with Active Directory and GPO to simulate a real corporate environment
- Configured vulnerable machines (DVWA, Metasploitable 2) and used Kali Linux to launch attacks, validating that the SOC tools correctly detected and alerted on each threat

SKILLS

Development: HTML, PHP, SQL | Python, Java | Automation scripts

Networks & Security: IP network configuration | Routing, switching, TCP/IP | Network simulation (GNS3, PNETLab) | Firewall configuration (FortiGate, pfSense) | Network analysis (Wireshark) | AES/RSA encryption | Basic pentesting

Systems & Administration: Linux (Ubuntu, Kali) | Windows Server | Active Directory & Group Policies (GPO) | DNS, DHCP, FTP | Web server management (Nginx)

Security Operations: SIEM (Wazuh) | Incident Response (TheHive, Cortex) | Threat Intelligence (MISP) | IDS/IPS (Suricata) | Log analysis & alert tuning

Soft Skills: Rigor & autonomy | Analytical mindset | Adaptability | Teamwork

LANGUAGES

Arabic: Native | **French:** Native | **English:** B2 (Upper-Intermediate)
